Frontlit singled sided matt banner.

Wide Format Equipment

Ball & Doggett supplies a complete range of wide format printing and finishing solutions to support solvent and eco-solvent production environments.

Solvent and eco-solvent printers are widely used across the signage and graphics industry for producing durable outdoor graphics including vehicle wraps, banners, posters and self-adhesive vinyl signage.

To support efficient production workflows, Ball & Doggett also provides finishing solutions including laminators, digital cutting tables and CNC routers – enabling printed media to be quickly converted into finished signage, retail displays and vehicle graphics.

For more information on our complete wide format equipment and finishing solutions, speak with your Ball & Doggett Sales Executive.

Solvent & Eco Solvent Printable Media Guide

PAPER

CityLight HQ 200 Poster Paper

1320mm x 50. 100M

Paper contains wet strength properties and is water resistant with high levels of whiteness, excellent transformation, transparency, stability and printability which is essential for backlit applications.

SELF ADHESIVE

Avery Dennison

All grades - commonly 1370. 1520mm x 45. 50M

Extensive range cast, polymeric and monomeric self-adhesive films to suit a variety of signage applications.

Metamark

All grades - commonly 1370. 1600mm x 50M

Extensive range cast, polymeric and monomeric self-adhesive films to suit a variety of signage applications.

MasterTac

All grades - commonly 1370. 1520mm x 50M

Innovative monomeric and polymeric self-adhesive films to suit a variety of signage applications.

WINDOW

Avery Dennison MPI Dusted Glass Easy Apply RS

1370mm x 50M

Suitable for digital and computer cutting to create a dusted effect on glass.

Avery Dennison SF 100 Ultra Clear

1372mm x 91.4M

Ultra transparent film featuring a printable polyester face.

Metamark M4-OF Frost

610. 1220. 1600 widths Opal etch effect 80ums monomeric film and allows 85% of light transmission. Suitable for digital and computer cutting.

Metamark M7-OH Opal Haze

610. 1220. 1600 widths Opal etch effect 80ums polymeric film and allows 75% of light transmission. Suitable for digital and computer cutting.

Metamark M7-CR Crystal, M7-DE Dusted, M7-SE Silver Etch

610. 1220. 1600 widths 70ums polymeric film and allows 56% of light transmission and offers a subtle glitter effect. Suitable for digital and computer cutting.

REPOSITIONABLE

Catalina PVC Electrostatic

1370mm x 45M, 1524mm x 91.44M

A soft PVC film designed to adhere to polished surfaces like glass and enamel. Available white or clear and had no adhesive.

Jellyfish Solvent PET Optically Clear

1370mm x 30. 50. 200M

Polyester optically clear film using resin technology to prevent residue after removal.

Gecko PET Optically Clear - Ultra Removable

1524mm x 50M

Optically clear polyester window graphic film.

Jellyfish PP White

1370mm x 25. 50. 100M

Thicker based polyester white film using resin technology to prevent residue after removal.

Spider Dot

1370mm x 50M

Installation made super easy with a dot shaped removable adhesive.

Yupo Octopus Eco Solvent WKE250

1270mm x 20M

100% bubble free and new generation suction type film - leaves no residue.

PERFORATED FILMS / ONE WAY VISION

Mastertac One-Way Vision Polymeric

1370mm x 50. 250M

Economical grade 1.5mm hole with 40% open area for promotional window graphics.
