The latest Apex adhesive system provides your assurance of high performance and clean removal, from a permanent adhesive. The high-quality, fully cross-linked, solvent-based adhesive provides a secure bond to the substrate after application.

MetaGlide® next-generation air release system offers improved all-round handling, enhanced layflat performance, smoother repositioning, and total adhesion confidence.

The MetaScape adhesive system offers ease of application by providing air with an exit route from under the graphic. It makes for faster, trouble-free application of larger graphics onto smooth, flat, or slightly curved surfaces.

MetaGrab® is an ultra-high tack adhesive. It has been uniquely developed to offer a very high tack onto rough, textured, and difficult-to-stick-to surfaces. Ultra Tack. Films that stick. Our highest adhesive tack available.
