

Hot Melt Hand Tape

SYNTHETIC RUBBER

Clear hot melt packaging tape is suitable for general purpose carton sealing or taping, and features high adhesion. Suitable for all general carton sealing and packaging in warehouses, mailrooms, homes and more. Available in 75m & 100m roll lengths.

FEATURES & BENEFITS

- / High Adhesion & Quick Bonding**
Strong initial tack ensures a secure seal on various carton types, including recycled and rough surfaces.
- / Waterproof & Durable**
Provides reliable sealing performance even in humid or damp conditions, maintaining carton integrity during storage, transit and handling.
- / Optimised for Machine Application & Manual Use**
Designed for both automatic taping machines and manual dispensers — the adhesive sets quickly and the roll unwinds smoothly, increasing packaging line efficiency and lowering waste.
- / Versatile for General Packaging**
Perfect for warehouses, mailrooms, and fulfilment centres — a dependable 'go-to' tape for everyday carton sealing.

APPLICATIONS

- / Carton & box sealing**
- / General packaging & shipping**
- / E-commerce fulfilment**
- / Warehousing & logistics**
- / Cold storage applications**

Item No.	Description	Rls/Ctn	Ctn/Pallet	Rls/Pallet	Gross Weight/Ctn
261585	Hot Melt Hand Tape 48mm x 75m	36	105	3,780	7.0kg
261586	Hot Melt Hand Tape 48mm x 100m	36	84	3,024	8.8kg

FREQUENTLY ASKED QUESTIONS

When should I use an Acrylic Tape instead of a Hot Melt Tape?

The best time to use an acrylic tape is when you need to ship long distance or when storing boxes in a cold environment. Hot melt tape is good choice for typical carton sealing as it feels stickier and has a higher initial tack.

Is Acrylic or Hot Melt Tape stickier?

Hot melt tape has a higher initial tack but is not as long lasting as an acrylic tape. Hot melt tape works great for sealing boxes that will be shipping in a few short weeks, whereas acrylic tape is a better choice for boxes that will be sitting in storage for a few months.

What tape is ideal for cold temperatures or long-distance shipping?

Acrylic tape is best suited for colder environments, as it has a stronger adhesion that will hold seals for longer than hot melt tape. Similarly, if you need to ship supplies over a long-distance acrylic tape will be the best choice for you.
